

Client: Sunday Times

Agency: Panelbase

Universe: Adults resident in Scotland

Methodology: Online

Sample size: 1024

Fieldwork dates: 09 September - 15 September 2016

Weighting: All the results were weighted by age, sex, SEG, and country of birth, and voters were also weighted to match the 2014 independence and 2016 Holyrood election results.

Note: a glitch was found in the data weighting after the newspaper reports had been released. These published tables are correct - some of the earlier reported figures are unchanged, others have moved by between one and three percentage points. For example, headline support for independence (excluding undecided) is 47% rather than the reported 48% - so an exact repeat of our results from January and April.
