Q14. The former Prime Minister David Cameron revealed in a TV interview that he asked the Queen to intervene in the Scottish independence referendum in 2014 by "raising an eyebrow". Q15. Q15. Gender dysphoria is a condition where a person feels a mismatch between their biological sex and their gender identity. For example, this may mean that a biologically male individual feels strongly that they are female, or a biologically female individual feels strongly that they are male. At present, most people who wish to legally change the sex or gender recorded on their birth certificate must first receive a medical diagnosis of gender dysphoria, but it is not necessary for them to have undergone gender reassignment surgery. The Scottish Government is committed to changing the law in Scotland within the next year to allow people to legally change their gender without a medical diagnosis of gender dysphoria, provided they make a solemn declaration that they are living in their new gender and will continue to do so. Q20. Some people argue that, in the interests of inclusion and equality for transgender people, athletes who have legally changed their gender from male to female should be permitted to compete in women's sporting events. Others argue that athletes who were born biologically male should be excluded from women's sporting events, because they would have an unfair advantage over other female athletes and might put other female athletes at greater risk of physical injury. Q21. Some people argue that it is bigoted or transphobic for lesbian women or heterosexual men to refuse to consider dating individuals who have changed their gender from male to female. Others argue that being attracted only to individuals who have been biologically female since birth is a normal part of how sexual attraction works for many lesbian women and heterosexual men, and that it is wrong to pressure people into dating individuals they are not attracted to. Q23. Some people argue that it is bigoted or transphobic to "misgender" a transgender person - for example to refer to them as 'he' or 'him' if their preferred pronouns are 'she' and 'her'. Others argue that forcing people to use particular pronouns when referring to a transgender person is an unacceptable attack on free speech. Which point of view do you find most persuasive?
